The certificate 3.3% Europe/Global Bonus&Safety refers to two renowned stock indices. The European stock benchmark **EURO STOXX 50®** and the global dividend stock index **STOXX® Global Select Dividend 100** serve as underlying for this certificate. This certificate is suited to investors who expect the European as well as the global economy to perform stably in the upcoming five years, and who deem price slumps of 51% or more unlikely to occur. The investment product without capital protection combines fixed interest payments of 3.3% annually with an initial distance to the barrier of 51%. The certificate has a term of five years. Please consider the opportunities and risks which are shown on the next page.

FUNCTIONALITY

At the initial valuation date, the closing price of the EURO STOXX 50® index and the closing price of the STOXX® Global Select Dividend 100 index are fixed as **starting value** and the respective **barrier** (49% of the respective starting value) is determined.

- **The fixed interest rate** of 3.3% is paid out annually, regardless of the performance of the two underlying indices (equivalent to 5x EUR 33 per nominal value).
- **Redemption** of the nominal value at the end of the term depends on the performance of the two indices. The index prices are steadily compared to their respective barrier during the observation period. At the final valuation date **one of the following scenarios** will apply:

SCENARIO 1: both underlyings daily quoted ABOVE their respective barrier

If the EURO STOXX 50® index **AND** the STOXX® Global Select Dividend 100 index always quoted above their respective barrier of 49% during the observation period, the certificate is redeemed at 100%, i.e. provided that none of the two indices ever declines by 51% or more compared to their starting value, investors obtain the nominal value of EUR 1,000 at the maturity date. This amount represents the maximum payout.

SCENARIO 2: one or both underlyings TOUCHED or UNDERCUT the barrier

If the EURO STOXX 50® index **AND/OR** the STOXX® Global Select Dividend 100 index touched or undercut the barrier of 49% of the respective starting value during the observation period, redemption at the maturity date is effected according to the index which performs "worst of" (performance in percent from the starting value to the closing price at the final valuation date) at the maturity date. Even if the barrier is touched or undercut, the maximum payout is limited to EUR 1,000 and investors do not participate in price increases of the indices beyond the starting value.

The **current level** of the EURO STOXX 50® index at 3,582.22 (closing price) as of Dec 19, 2017 would result in a barrier of 1,755.288 (equals 49% of 3,582.22).

STOXX® GLOBAL SELECT DIVIDEND 100 INDEX

Structured securities are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Structured securities react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at www.rcb.at/en/basoa
