FUNCTIONALITY

At the initial valuation date the starting value (closing price of the underlying index) is determined. At the end of the term the starting value is compared to the closing price at the final valuation date. If the STOXX® Europe ESG Leaders Select 30 index quotes at or above the starting value, redemption is effected at 140% of the nominal value. In case of a negative index performance the capital protection of 100% applies. At the final valuation date one of the following scenarios applies:

SCENARIO 1: Index quotes AT/ABOVE the starting value at the end of the term

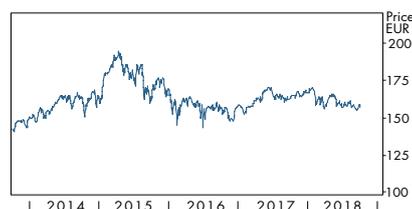

Investors obtain EUR 1,400 per nominal value if the STOXX® Europe ESG Leaders Select 30 index quotes at or above the starting value at the end of the term. This amount represents the maximum payout.

SCENARIO 2: Index quotes BELOW the starting value at the end of the term

In case of a negative index performance, the capital protection of 100% applies at the end of the term. This means that redemption is effected at 100% of the nominal value, which equals EUR 1,000 per nominal value.

The **100% capital protection** by Raiffeisen Centrobank only applies at maturity, i.e. during the term the certificate price may drop below 100%, but at the end of the term the investor obtains 100% of the nominal value in the worst case.
