INVESTMENT WITH MEMORY COUPON

In short:

With the Europe Dividend Stocks Memory Bonus&Safety 2 there is an annual chance of a yield of 6% if the price of the EURO STOXX® Select Dividend 30 index quotes at or above the starting value at one of the annual valuation dates. Forgone payments can be made up for in the following years. Redemption is effected at 100% provided that the index always quotes above the barrier of 49% of the starting value during the observation period. In the event of a barrier violation at the final valuation date, the investor is entirely subject to market risk.

The certificate **Europe Dividend Stocks Memory Bonus&Safety 2** is based on the European EURO STOXX® Select Dividend 30 index. This certificate is suited for investors who expect a stable performance of the underlying index in the upcoming 5 years and who deem price slumps of 51% or more unlikely to occur. The possible annual yield is 6% of the nominal value. The initial distance to the barrier (safety buffer) is 51% and the term is 5 years. Further details regarding opportunities and risks of this certificate are presented on the following page.

FUNCTIONALITY

At the **initial valuation date**, the closing price of the EURO STOXX® Select Dividend 30 index is fixed as **starting value** and the **barrier** (49% of the starting value) is determined.

- **Yield opportunity:** If the index closing price quotes at or above the starting value at the annual valuation date, the yield of 6% (equals EUR 60 per EUR 1,000 of the nominal value) is paid out. If the closing price on an annual valuation date quotes below the starting value, the interest payment will not be paid out for the affected year. Forgone payments can be made up for in the following year.
- The redemption of the nominal value depends on the index performance. The index price is continuously compared with the barrier during the observation period. At the final valuation date **one of the following scenarios will apply:**

SCENARIO 1: Index quotes always ABOVE the barrier

Provided that the EURO STOXX® Select Dividend 30 index always quoted above the barrier of 49% during the observation period redemption is effected at 100% of the nominal value. That means: if the index price never declines by 51% or more compared to its starting value, redemption at the maturity date is effected at EUR 1,000 per nominal value. This amount represents the maximum payout.

SCENARIO 2: Underlying TOUCHED or UNDERCUT the barrier at least once

If the barrier of 49% of the starting value (closing price at the initial valuation date) was touched or undercut during the observation period, redemption at the maturity date is effected according to the performance of the underlying index (percentage change of the EURO STOXX® Select Dividend 30 index from the starting value to the closing price at the final valuation date). Even if the barrier has been touched or undercut, the maximum payout remains limited at EUR 1,000 per nominal value and investors do not participate in price increases of the index above the starting value.

Underlying: EURO STOXX® Select Dividend 30 index

In the past five years, the EURO STOXX® Select Dividend 30 index would always have quoted above the exemplary barrier, provided that the barrier had been set retroactively. The price level of the EURO STOXX® Select Dividend 30 index at 1,965.43 on Sep 27, 2019 would have resulted in a barrier of 963.0607 (49% of 1,965.43).

OPPORTUNITIES

- **Yield opportunity:** Yield opportunity of 6% p.a. if the performance of the EURO STOXX® Select Dividend 30 index remains stable oder increases.
- **Safety buffer:** Partial protection against falling prices due to the safety buffer of 51% – barrier at 49% of the starting value
- **Flexibility:** Tradability on the secondary market, no management fees

RISKS

- **Violation of the barrier:** If the barrier is violated, the investor is entirely subject to market risk, without any protective mechanism.
- **Limited yield opportunity:** If the EURO STOXX® Select Dividend 30 index is not quoted at or above the payout level (=starting value) on any of the five annual valuation dates investors will not receive any yields.
- **Issuer risk / Bail-in:** Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Centrobank AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this marketing communication are provided purely as non-binding information. This marketing communication constitutes neither investment advice, an offer or a recommendation nor an invitation to execute a transaction. The information contained in this marketing communication is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this marketing communication substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This marketing communication has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The sole legal basis for all financial instruments described in this marketing communication is the Base Prospectus (including any possible supplements or amendments) which has been approved by the Austrian Financial Market Authority (FMA) in connection with the corresponding Final Terms of the financial instruments. The approved Base Prospectus (including any possible supplements or amendments) has been deposited at the Oesterreichische Kontrollbank AG. The approval of the Base Prospectus by the FMA should not be understood as an endorsement of the financial instruments described herein by the FMA. These documents as well as further information are provided on the website of Raiffeisen Centrobank AG at www.rcb.at/en/securitiesprospectus or www.rcb.at. Additional information on the financial instruments described herein may also be obtained from the respective key information documents that are available for download on the website of Raiffeisen Centrobank AG (www.rcb.at). Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Centrobank AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Structured securities are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Structured securities react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying.

Issuer Risk/Creditor Participation ("bail-in"): Any payments for structured securities during the term or at the end of the term depend on the solvency of the issuer (issuer risk). Investors are exposed to the risk that Raiffeisen Centrobank AG as an issuer might be unable to fulfil its obligations in respect of the described financial instruments, such as in the event of insolvency (inability to pay/over-indebtedness) or a legal order to initiate resolution measures. The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at www.rcb.at/en/basag. Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information. The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation.
