Acting ethically, ecologically and socially responsibly has developed into an important criterion also with regards to taking investment decisions within recent years. Pioneers in this field are amongst others also the Austrian Bishops' Conference and the religious communities in Austria, which have defined guidelines for ethical investments at an early stage. These guidelines, among other things, entail that no investments are to be made into companies whose business activities include weapon production, animal testing, gambling, tobacco, genetic engineering or nuclear energy. In order to invest along the ethical values of Christian social teaching, Raiffeisen Centrobank in cooperation with the renowned index provider STOXX Ltd. developed the iSTOXX® Global Ethical Select 30 Index. This index is built upon the above mentioned criteria.

This index acts as the underlying for the new capital protection certificate **Ethics Winner**, which enables investors to participate 1:1 in the positive index performance up to the cap of 140% of the starting value. This means the maximum payout at the end of the term is limited to 140% of the nominal value. In case of a negative index performance, the capital protection of 100% applies at the end of the term. The certificate has a term of 10 years. For details on risks and opportunities please see the following pages.

FUNCTIONALITY

Beginning of the term:

At the initial valuation date the **closing price** of the iSTOXX® Global Ethical Select 30 index is determined as **starting value** and the cap (140% of the starting value) is fixed.

End of the term:

At the end of the term, the performance of the iSTOXX® Global Ethical Select 30 index is evaluated. The index starting value is compared to the index closing price at the final valuation date. Investors participate at 100% in the performance of the underlying index up to the cap of 140% of the starting value. Thus, the maximum payout is limited to EUR 1,400 per nominal value. In case of a negative performance of the iSTOXX Global Ethical Select 30 index, the capital protection of 100% applies at the end of the term.

The **100% capital protection** by Raiffeisen Centrobank only applies **at maturity**, i.e. during the term the certificate price may drop below 100%, but at the end of the term the investor obtains 100% of the nominal value in the worst case.

At the final valuation date one of the following scenarios applies:

SCENARIO 1: Index performance is POSITIVE

At the end of the term the increase in the index price from the starting value to the closing price at the final valuation date up to a maximum of +40% is paid out in addition to the nominal value (equals a maximum payout of EUR 1,400 per nominal value).

If the underlying index quotes at or below its starting value at the final valuation date, the capital protection of 100% applies at the end of the term. In this case, redemption is effected at 100% of the nominal value at the end of the term (equals EUR 1,000 per nominal value).

Dividends and similar rights associated with the underlying are taken into account when structuring the Capital Protection Certificate and are not paid out.

The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. A total loss of the capital invested is possible. More detailed information is available at www.rcb.at/en/basag. Under certain circumstances, the issuer has the right to redeem the certificate prior to the maturity date. A total loss of the capital invested is possible.
