

AXA Express 6

- Underlying: share of AXA S.A.
- Annual yield opportunity of 8%
- Barrier at 60% of the starting value, only active at the end of the term (share delivery possible)
- Annually declining termination level
- Full market risk in case of barrier violation, issuer risk
- Further information on opportunities/risks on the following pages
- Term: 1 to 5 years (early redemption possible)

Investment product without capital protection
Bonus Certificate

This certificate provides the opportunity for early redemption each year and enables investors to obtain a yield of 8% per year if the price of the AXA share quotes on one of the annual valuation days at or above the annually declining termination level. In case the share price quotes below the respective termination level, the term will be extended by another year – up to a maximum of 5 years. If the barrier is violated at the end of the term, the investor is entirely subject to market risk.

This investment product complies with the sustainability standard for Raiffeisen Certificates and takes into account significant adverse impacts on sustainability factors ("PAIs"). raiffeisenzertifikate.at/en/sustainability

Issuer¹	Raiffeisen Bank International AG

How the certificate works

On the initial valuation date, the starting value of the underlying is determined and based on that the barrier and the termination levels are defined. On the respective annual valuation date, the price of the underlying is compared with the respective termination level. If the price of the underlying is at or above the termination level, (early) redemption of the certificate is effected at the predefined termination price:

Annual valuation dates	Is the price of the underlying greater/ equal to ...		Termination price
2024	100% of the starting value	yes ▶	108%
	no ▼		
2025	90% of the starting value	yes ▶	116%
	no ▼		
2026	80% of the starting value	yes ▶	124%
	no ▼		
2027	70% of the starting value	yes ▶	132%
	no ▼		
2028	60% of the starting value	yes ▶	140%
	no ▼		
	physical delivery of shares		

If there has been no early redemption by the last year of the term and if the price of the underlying is also below the termination level (corresponds to the barrier) on the final valuation date, physical delivery of shares is effected:

Physical delivery of shares

A defined number of shares is booked into the investor's securities account. The number is calculated as follows:

$$\text{Number of shares} = \text{Nominal value} / \text{starting value}$$

Usually this does not result in whole numbers. Due to the fact that shares are traded in whole numbers only, in the event of physical delivery the residual value is paid out in cash (= cash settlement) according to the market value:

$$\text{Cash settlement} = \text{Fraction of the shares} \times \text{final value}$$

Details on the opportunities and risks are given on the following page.

Underlying: AXA share

AXA SA is a French-based insurance company operating in the field of financial protection. AXA offers a wide range of products in various business areas: Life & Savings, Property & Casualty, Health, Asset Management and Banking.

Consideration of major adverse impacts on sustainability (PAI):

-  Greenhouse gas emissions
-  Species diversity (biodiversity)
-  Waste prevention
-  Water conservation and water consumption
-  Social, labor and human rights issues incl. corruption and bribery

Note

The referenced opportunities and risks represent a selection of the most important facts regarding the product.

You are about to purchase a product that is not easy and difficult to understand.

For further information, please refer to the base prospectus (including any supplements) approved by the competent authorities - published at raiffeisenzertifikate.at/en/securities-prospectus/ (we recommend reading the prospectus before making an investment decision) - and to the base information sheets as well as to "Customer information and regulatory matters" raiffeisenzertifikate.at/customer-information

Opportunities

- Yield opportunity: Yield opportunity already with constant underlying prices
- Safety buffer: Partial protection against price losses due to the initial safety buffer of 40% - barrier at 60% of the starting value
- Flexibility: Tradability on secondary market, no management fees

Risks

- Limited yield opportunity: The maximum yield is limited by the maximum amount.
- Barrier violation: If the barrier is touched or undercut, investors are entirely subject to market risk, without any protective mechanism. In the event of a physical delivery, the market value of the delivered shares will be less than the nominal value. Close to the barrier, disproportionate price movements of the certificate can also occur during the term.
- Issuer risk / Bail-in: Certificates are not covered by the Deposit Protection Scheme. Investors are exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency (issuer risk) or an official directive (Bail-in). A total loss of the capital invested is possible.

DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Registration Document approved by the Luxembourg Financial Market Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) - both documents together form the Base Prospectus - together with any supplements and the respective Final Terms of the described financial instrument filed with the FMA. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authorities. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG ([raiffeisenzertifikate.at](https://www.raiffeisenzertifikate.at)) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [raiffeisenzertifikate.at/en/basag](https://www.raiffeisenzertifikate.at/en/basag). A total loss of the invested capital is possible. Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that

the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The price of the Express Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Express Certificate. If the Express Certificate is sold, there is the risk to incur a substantial loss or even a total loss of the invested capital ("market risk"). The Express Certificate is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Express Certificate and are not paid out.

The financial instrument and the associated product documents may not be offered, sold, resold or delivered or published, either directly or indirectly, to natural or legal persons who are resident/registered office in a country in which this is prohibited by law. In no event may this document be distributed in the United States of America ("U.S.A.") to U.S. persons and the United Kingdom ("UK").

Certificates issued by Raiffeisen Bank International AG are no financial products as defined in the Regulation (EU) 2019/2088.

Supervisory Authorities: Austrian Financial Market Authority (FMA), European Central Bank (ECB). Imprint according to the Austrian Media Act: Media Owner and Publisher is Raiffeisen Bank International AG, Am Stadtpark 9, 1030 Vienna/Austria.
