\*Annual change in the harmonized consumer price index excl. tobacco of the euro area  
EURO STOXX 50® is a registered trademark of STOXX Ltd.

This certificate pays an interest rate equal to the inflation rate for the first year. In the second and third year you receive an annual fixed interest rate of 5.25%. Redemption at the end of the term is affected at 100%, provided the underlying always quotes above the barrier during the term. If the barrier is violated, you are exposed to the market risk on a one-to-one basis and a significant capital loss is possible.

### How the certificate works

For the first year, you receive an interest rate equal to the inflation rate. In the second and third year, the fixed interest rate is 5.25% p.a.

Year	2025	2026	2027
<b>Interest rate</b>	Inflation rate	5.25%	5.25%

The respective interest rate is paid out regardless of the performance of the underlying. The maximum yield is limited to the amount of the interest payments.

On the first valuation date, the starting value of the underlying is determined and the barrier of 49% of the starting value is defined on this basis. During the observation period, the price of the underlying is compared with the barrier.

The following options are available at the end of the term:

1. Barrier not touched or undercut

In this case, the redemption is 100%. This also corresponds to the maximum redemption.

2. Barrier touched or undercut at least once

In this case, payment is made on the maturity date in line with the performance of the underlying. The maximum redemption remains limited to 100% of the nominal amount.

Inflation rate: Annual percentage change in the coupon underlying, with the prices of the valuation month being used in each case.

The performance is defined as the percentage development from the starting value to the final value.

### During the term

- You can buy and sell the certificate on the secondary market at any time.
- The price of the certificate is subject to various influencing factors, including the performance of the underlying, its fluctuation range, dividend expectations as well as the interest rate level. This price may fall below the issue price, especially if the underlying moves close to the barrier.

### Issuer risk / creditor participation: Certificates are not covered by the deposit guarantee scheme.

There is a risk that Raiffeisen Bank International AG may not be able to meet its payment obligations due to insolvency (issuer risk) or any official orders ("bail-in"). In such cases, the invested capital may be lost in full.

### Kuponbasiswert

The harmonized consumer price index tracks the change in the general price level in the euro area.

By calculating the HICP, one obtains an overview of inflation for the entire euro area. It is thus used by the European Central Bank, among others, to monitor price stability as part of its mandate.

For this certificate, the HICP excluding euro area tobacco is used.

### Underlying: EURO STOXX 50®

It includes the 50 largest listed companies in the eurozone.

#### DISCLAIMER

In spite of all possible care taken, the data contained in this advertisement are provided purely as non-binding information. This advertisement constitutes neither investment advice nor an offer nor a recommendation nor an invitation to execute a transaction. The information contained in this advertisement is generic and no consideration is given to the personal circumstances of potential investors. The information contained in this advertisement substitutes neither the necessary individual investment advice for the purchase or sale of investments nor shall any investment decision be taken on the basis of this document. This advertisement has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete information for all financial instruments described in this advertisement as well as the sole legal basis for potential transactions in one of the described financial instruments is the Registration Document approved by the Luxembourg Financial Market Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) - both documents together form the Base Prospectus - together with any supplements and the respective Final Terms of the described financial filed with the FMA. The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authorities. Additional information on the financial instruments described herein may also be obtained from the respective key information documents (KIDs) that are available for download free of charge on the website of Raiffeisen Bank International AG ([raiffeisenzertifikate.at/en](https://raiffeisenzertifikate.at/en)) by entering the International Securities Identification Number (ISIN) of the respective financial instrument. Unless otherwise explicitly expressed in any of the cited documents above, no measures have been taken in any national legal system which should permit a public offering of the products described therein. Raiffeisen Bank International AG explicitly excludes any liability in relation to the correctness, appropriateness and completeness of the information presented herein. Certificates are risky instruments of wealth investment. Should the price of the respective underlying instrument of a certificate develop adversely, an investor may lose part or all of his or her invested capital. Certificates react more strongly or weakly to changes of the price of the underlying instrument depending on a number of factors (e.g. volatility or correlation of the underlying instruments, interest, dividends, remaining term, changes in foreign exchange rates) and do not move simultaneously with the underlying. Under certain circumstances the issuer is authorized to redeem the certificates prior to the agreed repayment date.

Issuer Risk/Creditor Participation ("bail-in"): Any payments during or at the end of the term of the certificates depend on the solvency of the issuer ("issuer risk"). Investors are therefore exposed to the risk that Raiffeisen Bank International AG might be unable to fulfil its payment obligations in respect of the described financial instrument such as in the event of insolvency ("issuer risk") or an official directive ("bail-in"). The resolution authority may also issue such an order before any insolvency proceedings if the issuer is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). For example, it can reduce the claims of investors in respect of the described financial instruments to zero, terminate the described financial instruments, or convert them into shares of the issuer and suspend investors' rights. More detailed further information is available at [raiffeisenzertifikate.at/en/basag](https://raiffeisenzertifikate.at/en/basag). A total loss of the invested capital is possible.

Past performance is no reliable indicator of future results. Please refer to the Base Prospectus for additional disclosures on risks as well as further information.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of creation. Please note that the legal situation may change due to legislative amendments, tax directives, opinions of financial authorities, jurisdiction etc.

The Bonus Certificate's price is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), bond interest rates, solvency of the issuer or remaining term. If the Bonus Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital. Dividends and similar rights associated with the underlying are taken into account when structuring the Bonus Certificate and are not paid out.
