With this certificate, you have an annual yield opportunity of 6.5% as well as the option of early redemption. If the underlyings are at or above the respective termination level on one of the annual valuation dates, (early) redemption is affected including interest of 6.5% per year of term. In case one of the values quotes below the respective termination level, the term will be extended by another year – up to a maximum of 5 years. If the barrier is violated at the end of the term, the investor is entirely subject to market risk.

### How the certificate works

On the first valuation date the starting values of the underlyings are fixed and the barriers are determined. On the annual valuation date, the prices of the underlyings are compared to the respective termination level. If the prices of all three underlyings quote at or above the respective termination level, the certificate is redeemed (early) at the defined termination price. The maximum possible redemption is limited by the maximum amount.

Annual valuation days	Is the underlying price greater than/ equal to the termination level?	Termination price
2026	<div>≥ 100% of the starting value?</div> <div>no</div>	yes ➡ 106.5% (CZK 1,065)
2027	<div>≥ 95% of the starting value?</div> <div>no</div>	yes ➡ 113.0% (CZK 1,300)
2028	<div>≥ 90% of the starting value?</div> <div>no</div>	yes ➡ 119.5% (CZK 1,195)
2029	<div>≥ 85% of the starting value?</div> <div>no</div>	yes ➡ 126.0% (CZK 1,260)
2030	<div>≥ 80% of the starting value?</div> <div>no</div>	yes ➡ 132.5% (CZK 1,325)
2030	<div>&gt; 60% of the starting value?</div> <div>no</div>	yes ➡ 100.0% (CZK 1,000)

Redemption 1:1 according to the worst performing underlying; for example if the worst performing underlying drops to 50% of the starting value, redemption at 50%

If there has been no early redemption by the last year of the term and if the price of at least one underlying quotes at or below the barrier on the final valuation date, redemption is effected 1:1 according to the performance of the worst performing underlying (percentage performance from the starting value to the final value).

### During the term

- You can buy and sell the certificate during trading hours at the current price.
- The price of the certificate is subject to various influencing factors, including the performance of the underlyings, their fluctuation range, correlation and dividend expectations as well as the interest rate level. This price may fall below the issue price and fluctuate sharply, especially if the underlying is close to the barrier.

#### Note

You are about to purchase a product that is not easy and difficult to understand.

For further information, please refer to the base prospectus (including any supplements) approved by the competent authority - published at [raiffeisencertificates.com/certificatesprospectus](https://raiffeisencertificates.com/certificatesprospectus) (we recommend reading the prospectus before making an investment decision) - and to the base information sheets as well as to "Customer information and regulatory matters" [raiffeisencertificates.com/en/customer-information](https://raiffeisencertificates.com/en/customer-information). The approval of the Base Prospectus should not be construed as an endorsement of the financial instrument described herein by the competent authority.

#### Legal and Risk Disclaimer for investors

The information provided is for general information purposes only and does not constitute investment advice, a recommendation or an invitation to execute a transaction. The information is generic and does not take into account the personal circumstances of potential investors. It is therefore not a substitute for individual investor and investment advice and risk disclosure. The advertisement was not prepared in accordance with the legal requirements designed to promote the independence of investment research and is not subject to the prohibition on dealing ahead of the dissemination of investment research.

The complete legal basis for potential transaction in a financial instrument described here is the Registration Document approved by the Luxembourg Financial Supervisory Authority (CSSF) and the Securities Note approved by the Austrian Financial Market Authority (FMA) – both documents together form the Base Prospectus – together with any supplements and the respective Final Terms filed with the FMA. The approval of the Base Prospectus by the competent authority should not be understood as an endorsement of the financial instruments described herein by these authority. Additional information on the financial instrument is available free of charge in the respective key information documents (KIDs) on the website of Raiffeisen Bank International AG (RBI) after entering the Security Identification Number (ISIN) at [raiffeisencertificates.com](https://raiffeisencertificates.com). Unless otherwise explicitly stated in these documents, no measures have been taken in any jurisdiction which should permit a public offering of the financial instruments described therein.

Issuer risk/creditor participation ('Bail-in'): All payments during the term or at the end of the term of the certificates are dependent on the solvency of RBI (issuer risk). Investors are exposed to the risk that RBI as the issuer might be unable to fulfil its payment obligations in respect of the financial instruments, e.g. in the event of insolvency (insolvency/over-indebtedness) or an official order for resolution measures by the resolution authority. The resolution authority may also issue such an order before any insolvency proceedings if RBI is judged to be in crisis. Under these circumstances the resolution authority has wide-ranging powers to take action (so-called "bail-in instruments"). Among other things, it can reduce investors' claims under the financial instruments described to zero, terminate the financial instruments described or convert them into RBI shares, and suspend investors' rights. Further detailed information is available at [raiffeisenzertifikate.at/en/bail-in](https://raiffeisenzertifikate.at/en/bail-in). A total loss of the invested capital is possible.

The information presented does not constitute binding tax advice. Tax treatment of investments is dependent on the personal situation of the investor and may be subject to change. As regards tax treatment and impact on the investor's individual tax situation, the investor is advised to consult with a tax advisor. This report is based on the knowledge the persons preparing the document have obtained up to the date of

creation. Please note that the legal situation may change due to legislative amendments, tax directives etc.

The price of the Express Certificate is dependent on the underlying's price. Adverse performances of the underlying may cause price fluctuations of the Express Certificate. If the Express Certificate is sold, there is the risk to incur a substantial loss or even a total loss of the invested capital ("market risk"). The Express Certificate is subject to several influencing factors and need not develop simultaneously to and in accordance with the underlying's performance. Such influencing factors include e.g. intensity of the underlying's price fluctuations (volatility), interest rates, solvency of the issuer or remaining term. If the Express Certificate is sold prior to the end of the term, there is the risk to incur a partial or even total loss of the invested capital (price performance). Dividends and similar rights associated with the underlying are taken into account when structuring the Express Certificate and are not paid out.
