## LEVERAGE CERTIFICATES Open End Turbo Certificates

The complete and comprehensive information on Raiffeisen Centrobank AG and on the issuance programme and the individual securities issues are contained in the Base Prospectus of Raiffeisen Centrobank AG of dated 21 July 2009 which is to be read in conjunction with these Final Terms. The Base Prospectus will be made available at Raiffeisen Centrobank AG, Tegetthoffstraße 1, 1010 Vienna, Austria during the usual business hours. These Final Terms also serve to complete the General Securities Terms of Raiffeisen Centrobank (Annex 1 of the Base Prospectus dated 21 July 2009).

For issues of individual securities which are only offered in Austria and/or Germany the Final Terms and the General Securities Terms are exclusively drawn up in German language.

Where a non-binding translation of the Final Terms is attached, it is hereby noted that the Austrian Financial Markets Authority has not reviewed the correctness of such translation.

8	"4.1.7 Strike Price"	<p><b>For certificates based on shares, GDRs, Gold, Silver and indices:</b> see column "Strike Price" in the excerpt of the offering. The provisions stipulated in Chapter V. 4.1.7 c) of the Base Prospectus in connection with the adjustment of the strike price/barrier are applicable with the modification that the financing costs of the certificates are added on a <b>daily</b> basis, if such day is a banking business day, otherwise on the next banking business day."</p> <p><b>For certificates based on the Natural Gas Future:</b> see column "Strike Price" in the excerpt of the offering. Different to the provisions of the Base Prospectus Chapter V. 4.1.7 c) the strike price and the barrier (see line 9) are adjusted on the date of the Roll-Over (as described in line 12, "Description of underlying instrument") by the financing costs and insofar as a replacement of the replaced future contract by the replacing future contract deems to be necessary. The issuer will take every effort to keep the holder of the certificates in the same economic situation as before the Roll-Over date. Moreover, different to the provision of the Base Prospectus Chapter V. 4.1.7 c) ii) 4. the following applies to the financing costs: The financing costs for the underlying instrument consist of the usual market interest rate plus an interest margin (open-end turbo long certificates) or minus an interest margin (open-end turbo short certificates). In case of structured securities based on futures (= underlying instrument) the underlying instrument already contains interest therefore, the usual market interest rate as used in the financing costs calculation equals to zero.</p>
9	"4.1.7 Barrier"	see column "Barrier" in the excerpt of the offering". Chapter V. 4.1.7 c) will be applicable with the modification that the Barrier will be adjusted in the same manner as described in line 8 ("Strike Price").

14	"4.1.7 Calculation of Residual Value"	<ol style="list-style-type: none"> <li>1. As soon as during the term of the turbo certificate the price of the underlying instrument reaches or falls below (turbo long certificates) the barrier (see line 9) or reaches or surpasses the barrier (turbo short certificates), the certificate is knocked out, which means that it is suspended from trading and either expires worthless or the issuer calculates a residual value from the closing out of the hedging deal.</li> <li>2. Calculation of residual value:  The issuer determines a residual value at the latest within three trading hours, which is derived from the closing out of the hedging deal. "Trading hours" means any time on which the relevant exchange of the underlying instrument as well as the Vienna Stock Exchange and/or EUWAX are open for trading and no market disruption event occurs. For the avoidance of doubt, the closing out of the hedging deal may occur at any time between the knock-out and the determination of the residual value. If permitted by the liquidity of the underlying, this period may also be shortened substantially. Under extreme market conditions, the residual value of the certificates may even be zero.</li> <li>3. When the certificates are knocked out, the residual value is determined by the issuer. Five banking business days later, the residual value of the certificate is automatically paid out by the issuer. If the day of the payout is not a banking business day, it is postponed to the next following banking business day.</li> </ol>

14	"4.1.7 Calculation of Residual Value" (cont.)	<p>4. The amount of the residual value is determined by how the underlying instrument behaves within the three hours after the knock-out.</p> <p>a. If in the case of turbo long certificates, the underlying instrument rises again after the barrier has been reached, the residual value might be slightly higher. Vice versa, if the underlying instrument falls further after the barrier is reached, the residual value might be accordingly lower.</p> <p>b. If in the case of turbo short certificates the underlying instrument rises again after the barrier has been reached, the residual value might be slightly lower, while the residual value might be slightly higher if the underlying instrument continues to fall after reaching the barrier.</p>
