

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

You are about to purchase a product that is not simple and may be difficult to understand.

Product

Product name	Capital Protection Certificate on EURO STOXX 50® (Price return index) ("Europe Winner USD 11/2021")
Product identifiers	ISIN: AT0000A20ET5 Series number: 31876 German Wertpapierkennnummer: RC0PUC
Manufacturer of the Product	Raiffeisen Centrobank AG (Issuer)/ www.rcb.at/ call +43/1/515 20-484 for more information
Competent Authority	Financial Market Authority (FMA), Austria
Date and time of production	15 October 2021 13:02 Vienna local time

1. What is this product?

Type This product is issued under Austrian law and entitles the respective holder to receive any amount due from us as the Issuer (bearer form).

Objectives (Terms that appear in **bold** in this section are described in more detail in the table(s) below.)
The product is designed to provide a return in the form of a cash payment on the **maturity date**. The amount of this payment will depend on the performance of the **underlying**. The product has a fixed term and will terminate on the **maturity date**.
On termination of the product on the **maturity date** you will receive a cash payment directly linked to the performance of the **underlying**. The cash payment will equal (i) the **product notional amount** multiplied by (ii) (A) the **final reference level** divided by (B) EUR 3,565.74. However, if this cash payment exceeds USD 1,250, you will only receive USD 1,250 (the **maximum payment**) and if it is less than USD 1,020, you will receive USD 1,020 (the **minimum payment**).

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the product issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Underlying	EURO STOXX 50® (Price return index) (ISIN: EU0009658145; Bloomberg: SX5E Index; RIC: .STOXX50E)	Strike level	EUR 3,637.0548 (102.00% of the initial reference level)
Underlying market	Equity	Cap	EUR 4,457.175 (125.00% of the initial reference level)
Product notional amount	USD 1,000	FX rate	1 (Quanto)
Product currency	U.S. Dollar (USD)	Reference level	The closing level of the underlying as per the reference source
Underlying currency	Euro (EUR)	Reference source	STOXX Limited
Issue date	15 May 2018	Final reference level	The reference level on the final valuation date
Initial reference level	EUR 3,565.74	Initial valuation date	14 May 2018
Protection amount	USD 1,020	Final valuation date	9 November 2021
Participation rate	100.00%	Maturity date / term	15 November 2021

Intended retail client The product is intended for private clients, professional clients and qualified counterparties who pursue the objective of general asset accumulation/asset optimization and have a short-term investment horizon. This product is for customers with basic knowledge and/or experience with financial products. The investor can bear no or only small losses on the capital invested and is willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 1 month. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

You are entitled to the return of at least the protection amount. As for the amounts of repayments, they depend on the future performance of the market and remain uncertain. However, this protection against forward market performance does not apply before maturity or in the event of immediate termination by the issuer.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

<i>Investment: USD 10,000</i>		
<i>Scenarios</i>		<i>1 month (Recommended holding period)</i>
Stress scenario	What you might get back after costs Percentage return (not annualised)	USD 8,822.77 -11.77%
Unfavourable scenario	What you might get back after costs Percentage return (not annualised)	USD 9,497.77 -5.02%
Moderate scenario	What you might get back after costs Percentage return (not annualised)	USD 10,127.30 1.27%
Favourable scenario	What you might get back after costs Percentage return (not annualised)	USD 10,724.70 7.25%

The average returns shown in the above table are not annualised, which means they may not be comparable to the average returns shown in other key information documents.

This table shows the money you could get back over the next month under different scenarios, assuming that you invest USD 10,000.

The scenarios shown illustrate how your investment could perform. The recommended holding period for this product is less than one year. The figures are therefore not calculated on a per year basis, but for the recommended holding period. Figures in this section and "4. What are the costs?" are therefore not comparable with figures given for products with a recommended holding period of at least one year. **The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.** The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Raiffeisen Centrobank AG is unable to pay out?

You are exposed to the risk that the issuer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or in case of certain resolution measures ordered by the respective resolution authority in case of a crisis of the issuer. In that case the resolution authority has a wide-ranging power to take actions, e.g. to reduce the claims of the investors up to zero, to terminate or convert the products into shares of the issuer, to suspend rights of the issuer ("Bail-In"). This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

4. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

Costs over time

<i>Investment: USD 10,000</i>		
<i>Scenarios</i>		<i>If you cash in at the end of the recommended holding period</i>
Total costs		USD 43.92
Impact on return (RIY)		0.43923%

The reduction in yield shown in the above table is not annualised, which means it may not be comparable to the reduction in yield values shown in other key information documents.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- The impact of the different types of costs on the investment return you might get at the end of the recommended holding period
- The meaning of the different cost categories.

The table shows the impact on return.

One-off costs	<i>Entry costs</i>	0.43923%	The impact of the costs already included in the price.
	<i>Exit costs</i>	0.00%	The impact of the costs of exiting your investment when it matures.

5. How long should I hold it and can I take money out early?

Recommended holding period: 1 month

The product aims to provide you with the return described under “1. What is this product?” above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 15 November 2021 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. No fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Not applicable	Price quotation	Percentage
Smallest tradable unit	USD 1,000.00		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint about the product or the conduct of the Issuer or the person advising on, or selling, the product can be submitted to Raiffeisen Centробank AG under the following address: Compliance Office, Raiffeisen Centробank AG, Am Stadtpark 9, 1030 Vienna or using the contact form on www.rcb.at/beschwerdemanagement or via email to complaints@rcb.at.

7. Other relevant information

Any additional documents in relation to the product are published on our website (www.rcb.at), including the final terms and the base prospectus as required by § 10 para. 3 no. 3 first case of the Austrian Kapitalmarktgesetz (Austrian Capital Market Act).

This Key Information Document is for submission in Czech Republic.
